

JI HOON PARK

Ulsan, Republic of Korea | +82-10-5323-7650 | jihoon426@unist.ac.kr | [LinkedIn](#)

RESEARCH INTERESTS

Auditing; Financial Reporting & Corporate Disclosure; Corporate Governance; Political Economy; Empirical Capital Markets; Econometrics & Causal Inference; Machine Learning in Accounting

EDUCATION

Ulsan National Institute of Science and Technology (UNIST), Ulsan, Republic of Korea Expected Feb. 2027
M.S. in Management Engineering | Graduate GPA: 3.98/4.30 | Full Government Scholarship

South Dakota State University, Brookings, SD, USA May 2025
B.S. in Data Science | Minor in Mathematics

SELECTED RESEARCH

Largest-Shareholder Ownership and Post-Filing Corrections: Monitoring, Detection, and Disclosure 2026
Working paper with Saiah Lee | Ulsan National Institute of Science and Technology

- Constructed a versioned OpenDART panel linking verified annual reports to subsequent corrections: 4,482 firm-years from 672 Korean listed nonfinancial firms (2018-2024); validated the ownership measure against 47,884 raw shareholder records.
- Implemented firm/year fixed effects, lagged-ownership, within-between, count, placebo, and sensitivity analyses. A 10-percentage-point ownership increase is associated with a 1.71-percentage-point lower 180-day correction probability; interpretation is explicitly non-causal.

Machine-Learned Financial Vulnerability and Corporate Investment under Geopolitical Uncertainty 2026
Research project | Korean listed firms

- Combines firm-level financial data, geopolitical-risk measures, machine learning, and panel methods to study heterogeneous corporate investment responses to macro-political shocks.

FOMC Sentiment Index Using FinBERT 2025
AI Challengers Program, UNIST - Second Prize

- Built an NLP-based time-series sentiment index from Federal Reserve statements and minutes, performed exploratory macroeconomic analysis, and deployed the index in a real-time dashboard.

RESEARCH EXPERIENCE

Graduate Research Assistant | Ulsan National Institute of Science and Technology (UNIST) Sep. 2025 - Present

- Collect, clean, and analyze large financial and economic datasets; apply econometric and machine-learning methods and prepare reproducible analyses, research reports, visualizations, and literature reviews.

Rising Scholar | Massachusetts Institute of Technology (MIT) Sep. 2024 - Mar. 2025

- Applied graph neural networks and protein language models to biological and gene-expression data; supported large-scale computational pipelines and multidisciplinary research.

Undergraduate Research Assistant | South Dakota State University Oct. 2022 - Jan. 2024

- Developed and improved iDEP for RNA-Seq analysis; performed data preprocessing, statistical analysis, and visualization for computational biology research.

PUBLICATIONS & PRESENTATIONS

Boehm, Frederick Joseph, and Ji Hoon Park. "Creating a User-friendly Shiny App for Reproducible Two-Sample Mendelian Randomization Studies." Invited presentation, SDSU Data Science Symposium, Genomics Track, February 7, 2025. [\[Program\]](#)

Park, Ji Hoon. "Identification of Age-Related Genes in Skeletal Muscle Using Ensemble Machine Learning." Zenodo, 2025. Uses GTEx transcriptomic data and XGBoost-based ensemble methods.

TEACHING EXPERIENCE

Teaching Assistant | MIT Beaver Works Medlytics

Jun. 2024 - Aug. 2024

- Taught Python programming, statistics, and machine-learning applications in healthcare; facilitated hands-on data-science projects and supported student teams.

HONORS & AWARDS

Full Government Scholarship | UNIST

2025 - Present

Second Prize, AI Challengers Program | UNIST

2025

Breakout Room Hero Award | MIT Medlytics

2024

Dean's List | South Dakota State University

Fall 2023

TECHNICAL SKILLS

Programming & Data: Python, R, SQL, MATLAB; Pandas, NumPy, Scikit-learn, XGBoost, R/Shiny, FinBERT

Methods: Panel-data econometrics, fixed effects, time series, causal inference, machine learning, deep learning, NLP, robustness/sensitivity analysis

Research Data: OpenDART; CRSP/Compustat; GTEx/GWAS summary statistics

Languages: Korean (Native); English (Fluent)

LEADERSHIP & SERVICE

Chair | U-SPECK (ROK-U.S. Alliance Leadership Program)

Apr. 2026 - Present

- Organize academic and policy-oriented activities on Korea-U.S. relations, political economy, and economic security; coordinate speakers and cohort programming.

President | Data Science Club, South Dakota State University

May 2024 - Apr. 2025

- Led technical workshops, invited academic and industry speakers, and organized collaborative quantitative projects.

ADDITIONAL PROFESSIONAL EXPERIENCE

Data Analyst | Republic of Korea Navy Headquarters, Gyeryong, Republic of Korea

Mar. 2020 - Dec. 2021

- Analyzed logistics and supply-chain data to support operational planning and resource allocation; translated English military documents for internal use.

Data Analyst | The Blessed Moon, Busan, Republic of Korea

Dec. 2021 - Jan. 2022

- Supported data-driven marketing and business analysis and improved internal data organization and administrative workflows.

ADDITIONAL TRAINING

Industrial Optimization: Models & Linear Programming | Northeastern University

2025

Microeconomics Principles Specialization | University of Illinois Urbana-Champaign

2025
